Summary

I'm a Software Engineer with an interest in designing websites, especially things related to Front-end stacks and UIX Designer. I am always eager to take on new challenges and opportunities that push me out of my comfort zone and help me grow as a developer

Work Experiences

Software Engineering

Jul 2021 - Apr 2023

[Datahouse Asia](#)

I participated as a Software Engineer Intern. After 1 year, I was promoted to Middle Software Engineer at DHA

My main tasks are:

- Consult & design Front-end architecture and solutions.
- Working on multiple projects simultaneously in both Web and Mobile apps
- Research and apply new technologies to the Front-end repository.
- Manage tasks & efforts for the Front-end team.
- Review code & support team members.
- Interview, Technical training for interns & new junior F.E (React) developers.

Technologies: React, Redux, React Query, Restful API, AWS services, Firebase, SEO

Domain: US public sectors

Freelance Web Developer

Aug 2020 - Present
